## Consumer Expenditures for the Dallas Metropolitan Area — 2019–20

Households in the Dallas-Fort Worth-Arlington, TX, metropolitan area spent an average of \$62,306 per year in 2019–20, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Michael Hirniak noted that this figure was not significantly different from the \$62,188 average expenditure level for households in the United States. Dallas-area households allocated their dollars similarly to the nation in 5 of the 8 largest major components. Three of the largest components in the local area differed significantly from their respective U.S. averages. For example, the share of expenditures for housing, which accounted for 37.4 percent of the average household's budget in the Dallas area, was higher than the national average of 33.8 percent. (See [chart 1](#) and [table 1](#).)

**Chart 1. Shares of average expenditures for selected major components in the United States and Dallas-Fort Worth metropolitan area, 2019–20**

Note: An asterisk indicates a statistically significant difference at the 95-percent confidence level.

Source: U.S. Bureau of Labor Statistics.

### Highlights of the Dallas area's 2019–20 spending patterns:

- **Housing:** This was the largest expenditure component for Dallas-area households and averaged \$23,277. Housing accounted for 37.4 percent of the area's household budget, significantly higher than the 33.8-percent U.S. average. Among the 22 metropolitan areas nationwide for which data were

available, Dallas was 1 of 10 areas to have a housing expenditure share that was significantly higher than the national average. Housing expenditure shares among the 22 published metropolitan areas ranged from 39.1 percent in New York to 31.8 percent in St. Louis. (See [table 2](#).)

- **Transportation:** Dallas-area households spent 15.6 percent of their budget on transportation, not significantly different from the national average of 16.5 percent. Of the \$9,696 in annual transportation expenditures in Dallas, 94.7 percent was spent buying and maintaining private vehicles; this compared to the national average of 94.9 percent.
- **Food:** The portion of a Dallas household's budget spent on food, 10.0 percent, was significantly lower than the 12.5-percent U.S. average. Dallas-area households spent \$3,466, or 55.8 percent, of their food dollars on food at home and \$2,742 (44.2 percent) on food away from home. In comparison, the average U.S. household spent 61.9 percent of its food budget on food at home and 38.1 percent on food away from home. Among the 22 metropolitan areas nationwide for which data were available, Dallas was 1 of 7 areas to have a food expenditure share that was significantly lower than the national average. Food expenditure shares among the 22 published metropolitan areas ranged from 16.3 percent in Honolulu to 10.0 percent in Dallas.

### Additional Information

Data in this release are from the Consumer Expenditure Survey (CE), which the U.S. Census Bureau conducts for the U.S. Bureau of Labor Statistics. The data in this release were averaged over a 2-year period, 2019 and 2020.

A household in the CE survey is defined as a consumer unit which includes families, single persons living alone or sharing a household with others but who are financially independent, or two or more persons living together who share expenses. The terms household or consumer unit are used interchangeably for convenience.

Differences in spending among metropolitan areas may reflect differences in the cost of living, but they also may reflect other causes. Spending differences may result from different consumer preferences or variations in demographic characteristics, such as household size, age, or income levels. However, expenditure shares, or the percentage of a household's budget spent on a particular component, can be used to compare spending patterns across areas. Sample sizes for the metropolitan areas are much smaller than for the nation, so the U.S. estimates and year-to-year changes are more reliable than those for the metropolitan areas. Users should also keep in mind that prices for many goods and services have changed since the survey was conducted.

A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with our ability to make confident statements about a universe based on a sample. A large difference between two values may not be statistically significant, while a small difference could be significant; both the sample size and the variation among the values in the sample affect the relative error of the estimates.

For additional technical and related information, see <https://www.bls.gov/opub/hom/cex/home.htm>. Data for the nation, the four geographic regions of the United States, and 22 metropolitan areas nationwide are available at [www.bls.gov/cex/tables.htm](http://www.bls.gov/cex/tables.htm). Metropolitan definitions used in the survey are available at [www.bls.gov/cex/ce\\_msa\\_201516.htm](http://www.bls.gov/cex/ce_msa_201516.htm). The metropolitan area discussed in this release is the Dallas-Fort Worth-Arlington, TX Metropolitan Statistical Area which comprises Collin, Dallas, Denton, Ellis, Hood, Hunt, Johnson, Kaufman, Parker, Rockwall, Somervell, Tarrant, and Wise Counties in Texas. Metropolitan area news releases for the Consumer Expenditure Survey are available at <https://www.bls.gov/regions/subjects/consumer-spending.htm>.

Information in this release will be made available to individuals with sensory impairments upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

### **Coronavirus (COVID-19) Pandemic Impact on 2019-2020 Consumer Expenditure Surveys Data for Metropolitan Statistical Areas**

Data presented in this release reflect data collected both before and during the COVID-19 pandemic. Due to the pandemic, data collection by personal visit for the CE program was suspended March 19, 2020. Instead, data were collected either online or by phone. Data collected in 2019 and prior to March 19, 2020, were conducted by personal visit. More information about the impact of the pandemic on CE data is available at [www.bls.gov/covid19/effects-of-covid-19-pandemic-and-response-on-the-consumer-expenditure-surveys.htm](http://www.bls.gov/covid19/effects-of-covid-19-pandemic-and-response-on-the-consumer-expenditure-surveys.htm).
